

Trial Timing system

We are trialling a new lap counting system
which if successful will replace our existing system in 2021

Your co-operation is sought in helping us.

*The existing keyfob/lozenge tag (right) is still required
and should not be removed.*

You will be supplied with two new self adhesive tags either

Monza R6 paper tag

or

Alien H-3 hard tag

Please remove any of this style of tag you may have been given at any other race and place the new ones on the top of the car bodywork or a non-metallic part, one on each side in suggested locations as shown by coloured boxes below. One of the short edges should face forward, long edge to side, tag should be parallel to the ground or if not possible angled to rear. Tag must have clear unobstructed view of the sky. Please don't put behind wheels, or on a cycle helmet. If your bodywork is metal or carbon fibre please ask for advice from lapcount.
